

## Introducing Powerbit for T-WiZ60 threads

In December of 2015, Atlas Copco Secoroc introduced an all-new bit range for topammer drilling – Powerbit. The first thread system to reach the market was T45. Since the introduction, Powerbit T45, T51, ST58 and ST68 have met, and surpassed all goals and expectations. Service life is improved up to 75 % – at significantly higher penetration rates.

### Powerbit T-WiZ60

Now, we introduce Powerbit T-WiZ60 (92 mm – 152 mm) for bench drilling and construction sites. Powerbit T-WiZ60 has all the same characteristics that have made Powerbit so successful. The bit shape is optimised. The bit body steel is harder and stronger. And the patented Enduro Extra button surface treatment technology and Trubbnos button shape, are developed for outstanding strength and wear resistance. The 140 mm and 152 mm T-WiZ60 Powerbits also feature a Powerface with five gauge button islands. This design maintains the correct distance between the gauge buttons so that as much of the wellbore floor can be crushed with as few hammer strokes as possible.

### All the benefits of T-WiZ60

Powerbit T-WiZ60 is optimised for the unique Atlas Copco Secoroc T-WiZ60 drill string. The T-WiZ60 thread system offers great thread stability and robustness. In fact, this drill string has proved to give up to 30 % longer service life. Finally, the T-WiZ thread is so much easier to uncouple and change, which saves you time and frustration. Welcome to the topammer world of Atlas Copco Secoroc.

**Atlas Copco** is a world-leading provider of sustainable productivity solutions. The Group serves customers with innovative compressors, vacuum solutions and air treatment systems, construction and mining equipment, power tools and assembly systems. Atlas Copco develops products and service focused on productivity, energy efficiency, safety and ergonomics. The company was founded in 1873, is based in Stockholm, Sweden, and has a global reach spanning more than 180 countries. In 2016, Atlas Copco had revenues of BSEK 101 (BEUR 11) and more than 45 000 employees. Learn more at [www.atlascopcogroup.com](http://www.atlascopcogroup.com).

**Atlas Copco Secoroc** is a division within Atlas Copco's Mining and Rock Excavation Technique business area. It develops, manufactures and markets rock drilling tools worldwide. Its products are used for rock excavation within the mining and construction business for both surface and underground applications. The division is headquartered in Fagersta, Sweden and has production on six continents.
