

IST GRIPASSIST

GripAssist

Eliminate human contact with GET during installation and removal.

Handles any GET

No matter what GET you've got on site, the GRIPAssist can handle it. It can lift and move all types of GET up to 500kg regardless of manufacturer or machine, including hydraulic excavators, wheel loaders, rope shovels, and draglines.

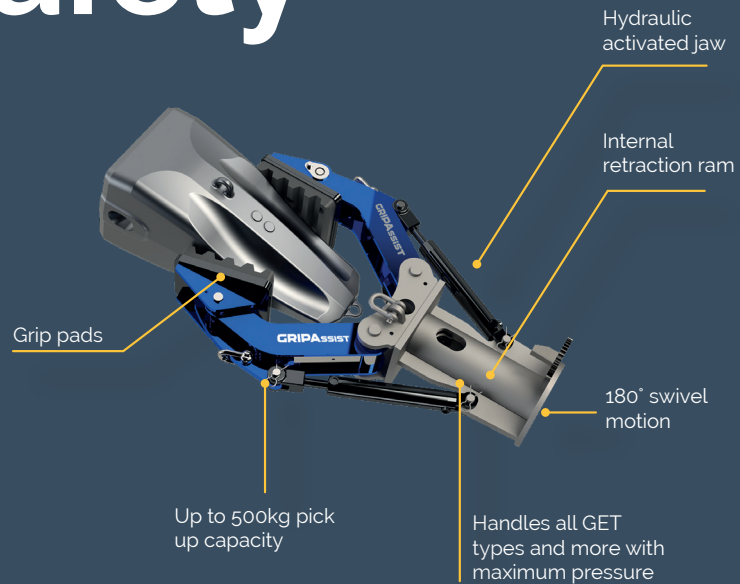

Revolutionizing Mining Safety

Universal GET Handling

The GRIPAssist is a hydraulic arm that grips GET. It attaches to a skid steer, controlled through the skid steer operator.

- The hydraulic arms can remove any category of GET
- Maintenance is a breeze with bolt-on, bolt-off grip pads
- 180-degree swivel motion lets you maneuver GET anywhere it needs to go
- Fits onto any track-based skid steer with a lifting capacity of over 950kg

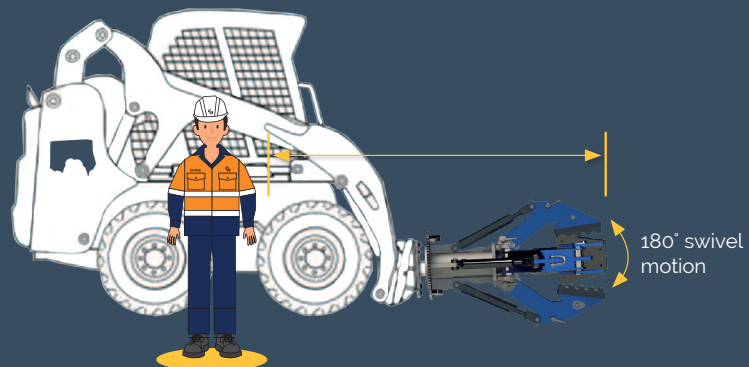

Safer, Quicker GET Handling

By removing direct human interaction, GRIPAssist significantly reduces injury risk. No more dangerous suspended load, hammers, pry bars, or other hand tools.

By removing hand tools, GET changeouts get seriously speedy. The power hydraulic arms and tough rubber grip pads assist the removal of GET and reduce typical injuries that occur during GET interactions.

Up to 32% of injuries in surface mining occur due to strenuous movements.* Reduce the risk with the GRIPAssist by removing and repositioning GET without high risk human contact.

*Safety Performance in the WA mineral industry 2018-19

United in performance. Inspired by innovation.

Performance unites us, innovation inspires us, and commitment drives us to keep moving forward. Count on Epiroc to deliver the solutions you need to succeed today and the technology to lead tomorrow.
