

SaberEdge™

Optimized performance meets reliability and durability.

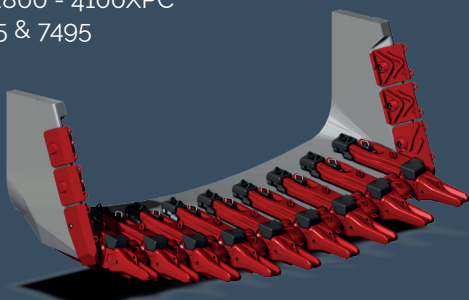

Reduced operational cost through maintenance reduction

- Reduced lip repair through increased adapter stabilization
- Increased production through quick hardware change out
- Standard mechanical wear protection - Saberlock™
- Optimized lip shrouds resulting in less throwaway material

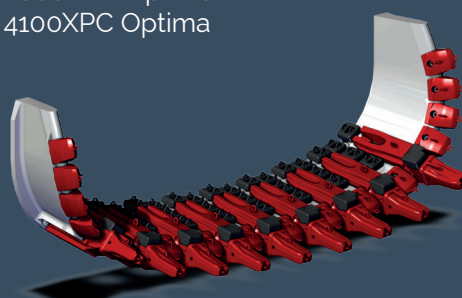

Square Corner

- Komatsu 2800 - 4100XPC
- CAT BE495 & 7495

Wide Radius

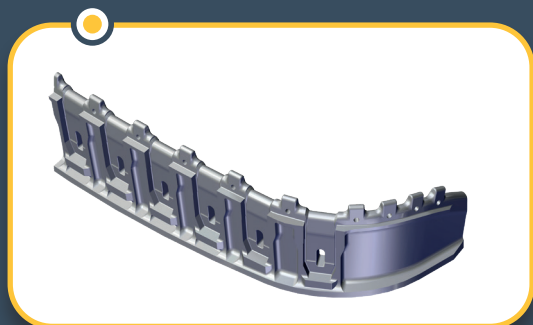

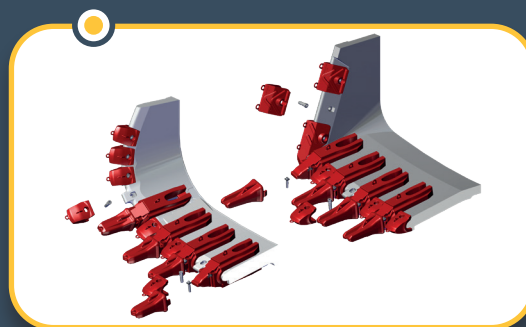

- Komatsu 2800XPC Optima
- Komatsu 4100XPC Optima

Efficient and Versatile

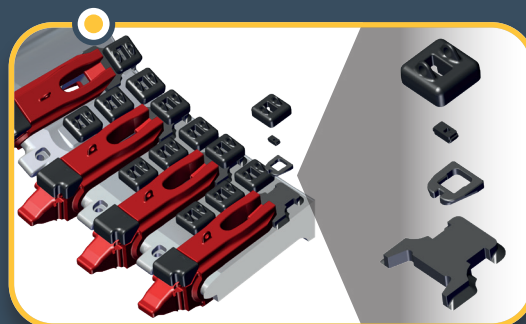

Universal GET

Simplify your stock orders and logistics with a suite of universal GET and mechanical locking systems. The Saberedge GET fits both square corner and wide radius rope shovel lips to enhance your dig experience.

Mechanical Wear Pad System

Eliminate hot-work and decrease risk and downtime with our fully mechanical wear pads. The Saberlock system offers a fully customizable application, providing total lip protection for any bucket. This system can also be used for entire bucket liner packages.

Reduced Maintenance

The Saberedge lip offers increased adapter stabilization on both sides of the lip. Stabilizing the adapter onto the lip reduces lip wear and lip maintenance, resulting in shorter downtimes with increased production.

United in performance. Inspired by innovation.

Performance unites us, innovation inspires us, and commitment drives us to keep moving forward. Count on Epiroc to deliver the solutions you need to succeed today and the technology to lead tomorrow.
