

ABC DTH

Automatic Bit Changer for DTH applications

Designed for DTH applications

By automating one of the most repetitive and hazardous tasks in the drilling process, Epiroc's Automatic Bit Changer DTH (ABC DTH) eliminates manual bit handling during bit changes, reducing live work, minimizing downtime, and improving machine availability. Designed for down-the-hole (DTH) drilling applications, ABC allows operators to complete the entire bit change process from the safety of the drill cabin or remotely, increasing productivity while supporting the continued advancement of autonomous drilling.

⊕ Main benefits

+ Live work elimination

Automate bit changes without manual handling. Operators can complete the entire process from the drill cabin or remotely, improving safety by eliminating live work during bit changes.

+ Efficiency and productivity

Automated bit changes reduce downtime, improve machine availability, and deliver fast, consistent performance that keeps drilling operations running efficiently.

+ Flexible bit management

The removable carousel accommodates multiple bit sizes and types, allowing operators to quickly switch between applications while protecting drill bits from damage and contamination.

+ Down-The-Hole

Engineered specifically for down-the-hole (DTH) drilling applications, ABC automates bit changes while delivering proven safety, productivity, and reliability to drill the toughest materials.

Service and support

Epiroc offers several types of service agreements to meet your operational requirements and maximize your productivity:

Variable-price repairs Service when you need it.

Fixed-price repairs Service with controlled costs.

Equipment audit Scheduled equipment quality control.

Preventive maintenance programs Peace of mind so you can focus on your core business.
