

Epiroc Group Sustainability Policy

Epiroc Sustainability Policy

Epiroc is a vital part of a sustainable society and a global productivity partner for mining and infrastructure customers. With ground-breaking technology, Epiroc develops and provides innovative and safe equipment, such as drill rigs, rock excavation and construction equipment and tools for surface and underground applications. The company also offers world-class service and other aftermarket support as well as solutions for automation, digitalization and electrification.

Purpose and scope

We want to contribute to the sustainable development of society and we support the Paris Agreement and the UN Sustainable Development Goals. We are also a signatory to the UN Global Compact and fully support the 10 principles in the areas of human rights, labor, environment and anti-corruption.

Through our extensive offering, we provide safe, efficient and low-carbon solutions that reduce our environmental footprint and meet customer demands for safe and sustainable solutions, which also contribute to reducing the negative impact on climate change and biodiversity. We work in close collaboration with our customers and other stakeholders to find solutions for these global environmental challenges.

Our products and services are developed to meet the productivity, quality, functionality, safety and environmental needs of our customers, regulations, laws and other stakeholder's expectations. We evaluate relevant products, services, processes, working conditions as well as major changes from a quality, safety, health and environmental view while focusing on eliminating risks and embracing opportunities to continuously improve the way we do things.

With a lifecycle perspective we strive to address and minimize the negative environmental effects that the products and services may have when developed, manufactured, distributes and used, as well as during disposal and end of life treatment.

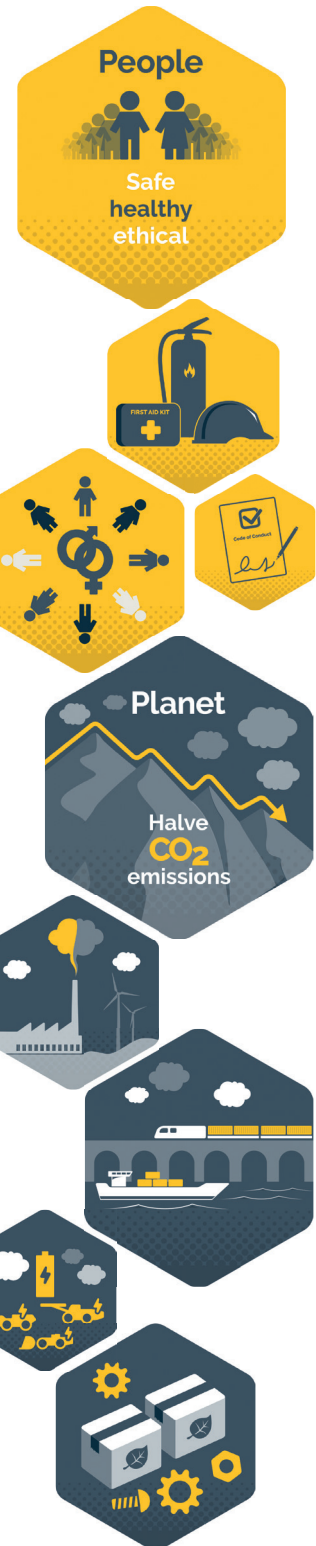

We do business the right way and we follow appropriate business conduct to live up to the high ethical standards and integrity we hold ourselves to.

Sustainability goals

We see sustainability as a long-term growth driver and we set short, medium and long term targets to ensure we tackle important challenges head on and leverage our positive impacts together.

Responsibility

This policy is applicable to all units within the Epiroc Group. The operational responsibility of each Divisional President, General Manager and Manager in the Group includes all sustainability aspects as well as the communication and implementation of this policy and its spirit.

1st June 2021

Wayne Sterley

Regional General Manager
Southern Africa

United in performance.
Inspired by innovation.
