

You've got the power.
We've got your back.

Batteries with Service

Own your
battery.

Get all the
service you
need.

We put green evolution first and aim for a more sustainable world. Tomorrow's mining requires us to use our resources in a wise and environmentally responsible way, while supporting our customers in making sustainable choices for the future.

You've got the power. We've got your back.

Batteries with Service is a new service solution developed to support your business. A chance for you to **own your battery and at the same time get all the service you need** – when you need it. Our offering includes several benefits to create a sustainable business model – a shortcut to worry-free operations.

You own the battery and are in control of your own equipment. **You've got the power.**

We stand by you when it comes to proper configuration, performance, safety, guidance, upgrades and warranty. We know your equipment inside and out. **We've got your back.**

Telematics

**You've got
the power.**

With battery telematics we can predict your battery's health status and improve and adapt our service based on these insights. All battery data is available at the battery itself or from a distance, keeping our technicians informed at all times.

Battery audits

**We've got
your back.**

To minimize unplanned downtime and production losses, proactive and professional inspections by trained technicians are regularly performed through this service. This increases both your productivity and your safety.

Extended warranty

**You've got
the power.**

We offer an extended warranty for your batteries, prolonging it from 1 year to 3 years to guarantee you peace of mind. This gives you the opportunity to benefit from our professional backup for a longer period of time.

Recom- mendations and guidance

**We've got
your back.**

We have developed your equipment and know how to address your questions. We provide you with appropriate recommendations and guidance in your day-to-day work.

Telematics

Your battery is self-sustained and can operate inside and outside a vehicle, meaning that it is equipped with its own telematics. Battery data provide information and insight on how to optimize operations and prevent downtime, safeguarding your productivity. At a distance or on site. We collect data that enable us to constantly improve and develop battery performance through digital configuration and upgrades.

Battery audits

Regular checks on battery health will keep your equipment up and running. This means minimal downtime, resulting in more predictive and effective operations.

- Regular health checks
- Detecting and treating potential problems or signs of premature wear
- Improving safety, health and durability
- Maximizing productivity
- Maximizing reliability

Extended warranty

With Batteries with Service we offer a prolonged warranty. When you own your own battery, the importance of trust and the value of long-term reliability are key. That is why we offer you an extended battery warranty. Batteries with Service prolongs the standard warranty from 1 to 3 years and doubles the guaranteed usage. This, together with our expertise and service, safeguards the introduction of your Battery Electric Vehicles.

Recommendations and guidance

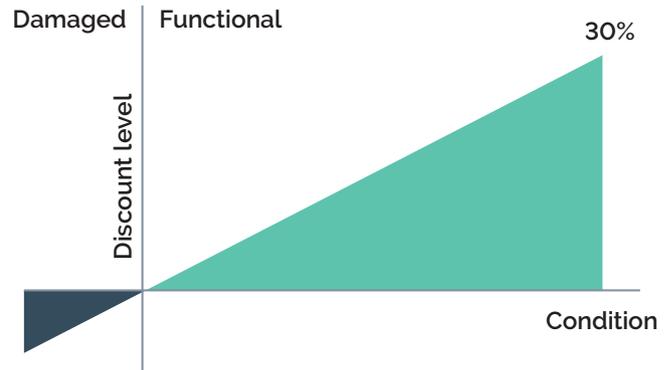

Through advanced performance analysis, we will help you get the best out of your equipment. We guide you in optimizing usage and advise you on where to place your charging equipment, in order to increase battery life and thus reduce costs.
