

RigLife agreement

Expert advice, professional guidance

A longer, happier life for your fleet

RigLife agreement from Epiroc is a short cut to a worry-free business life. It is a service concept for mining and rock excavation equipment designed and developed to keep your machines performing with maximum reliability. In short, the ones that built your machine, are the ones who enables it to perform at its best – through audits, information and guidance.

The RigLife agreement is suitable for both surface and

Telematics

Our telematics solution Certiq will keep you in touch with your machine. It gathers, compares and communicates vital equipment information, such as operation and usage, status and maintenance data.

Equipment audits

Proactive, professional inspections from OEM help minimize unplanned downtime and production losses. It boosts productivity and improves safety – for you and your equipment.

underground equipment. It consists of four parts:

Extended warranty

Where there is a risk, we have you protected. Our extended warranty covers costs for the premature failure of parts and components. Secure your profitability with extended warranty.

Safety and maintenance recommendations

Never again will you have to worry about your equipment's service needs. Safety and maintenance guidance is a vital part of the RigLife agreement, because we know your machine inside and out.

Telematics

One step ahead

Access machine data and stay informed with production monitoring and different alarm levels. RigLife includes our telematics solution Certiq which compares and communicates vital equipment information. It provides data on machine usage, equipment status and maintenance, all directly accessible in our user friendly web portal.

Enjoy high productivity and get more out of your equipment without manual intervention. Our telematics solution is available for most mining and construction equipment for both surface and underground.

Telematics quick facts

Gathers, compares and communicates vital equipment data

Proactive maintenance information

Complete overview of your operations in real time, 24/7, from anywhere

Information for each individual machine

Troubleshooting from a distance

Identify areas in need of improvement

Equipment audits

Regular health checks keep you up and running

RigScan is an advanced audit, which provides, real time, non-intrusive data on equipment running conditions and performance, from the inside. The RigScan audits are incorporated into your RigLife agreement and help minimize unplanned downtime and prevent production losses. RigScan boosts productivity and improves safety – for you and your equipment.

Key to a successful operation is that your equipment can safely maintain peak performance.

⊕ Audits quick facts

Regular health checks keep you up and running

Detect and treat problems in time

Improve safety, health and the environment

Detect signs of damage

Identification of internal problems enhances safety

Maximum productivity

Avoid unplanned maintenance

Extended warranty

A safeguard to depend on

Efficient mining and cost of ownership are the focus for most machine operations. However, the mining environment can be unpredictable, with unexpected and unwelcome problems arising without warning.

Don't worry, we've got your back. As part of the RigLife agreement our extended warranty covers the costs for the premature failure of parts and components. This is a trustworthy program against unplanned parts expenses, an issue that can negatively impact operational budgets.

Safety and maintenance recommendations

Decision making made easy

You'll never need to doubt about how and when to care for your machine again. Our experts know your machine inside out and maintenance guidance is a vital part of the RigLife agreement. We have the skills you need and the reliability you want.

RigLife agreement from Epiroc

A smart and economic way to keep your fleet healthy and productive over the years. It keeps you satisfied and everyone working with you safer. RigLife agreement is a service concept that consists of four parts:

- ⊕ **Telematics**, supplies you with real-time machine status and performance information
- ⊕ **Equipment audits**, maximum reliability through information and guidance
- ⊕ **Extended warranty**, protection against unexpected expenses
- ⊕ **Safety and maintenance recommendations**, advanced performance analysis to lower the cost of operation

RigLife pays off in the long run. Find out more, contact your local Epiroc representative.

United in performance. Inspired by innovation.

Performance unites us, innovation inspires us, and commitment drives us to keep moving forward. Count on Epiroc to deliver the solutions you need to succeed today and the technology to lead tomorrow.
