

RCS Trainer

A training software that provides training for the machine control system menus without having to access the actual machine.

Epiroc

Effective and safe training, remote and quick support

The RCS Trainer allows access to multiple Epiroc Rig Control System (RCS) applications in a safe and controlled environment.

Main benefits

Preparation - Become acquainted with a new machine prior to its arrival.

Training - Parts of operator training and service training can be done in a safe and controlled environment.

Productivity - Important competence development is done without interfering with valuable production time.

Easily ordered USB license key.

Start and stop RCS-simulation software on a desktop outside the real machine.

Various number of machine types available for download 24/7.

Technical specifications

System requirements

- Windows 10 (minimum requirement) or higher. Works from Windows 10 May 2019 (1903). Use Windows Updater to meet this requirement on Windows 10.
- Windows Updater has been run to install the latest Windows updates. This solves connection issues to the Azure servers.
- At least 16 GB RAM to run RCS Trainer effectively.
- Local administrator privileges.

Available applications

Packages and configurations for various applications including drill rigs, rock reinforcement, loaders and trucks are available for download. We continuously update the range of available applications. For more details, please visit www.epiroc.com/rcs-trainer
