

# Drill Pipe Service Truck

At Epiroc we build on proven expertise and performance to make what's good even better. You can call on us to keep your equipment running reliably with expert service. And you can choose us with confidence, knowing we are committed to safety, environmental and social responsibility in everything we do.

Our latest service offering is our Drill Pipe Service Truck that enables our trained operator to remotely control the onboard crane to handle your blasthole drill rods safely and efficiently.

## Key Features and Benefits

- Remote Controlled for safe, efficient operations. Utilising technology to eliminate live work hazards (personnel and equipment)
- Over load protection system alerts when nearing 90% with auto-shut off when 100% is reached.
- Capability to conduct in the field pipe change outs reducing drill down time and associated costs
- Three ergonomically elevated pipe stands designed to support a maximum drill length of 42Ft (13m), adjustable to suit shorter pipes
- Live Onboard Load system for monitoring and ensures stability and smooth operation
- Fit-Out to Mine-Specs / Certification
- Designed and Custom Built to Australian Standards to handle the most common drill pipe sizes in the market
- Drill Rod Lengths: 6m - 13M (20Ft - 42Ft)
- Drill Rod Diameters: 114mm - 275mm (4-1/2" - 10 3/4") Diameters
- Maximum Weight: 7.9T at 4.5M
- Maximum Reach: 12.2M at 2.6T
