

SmartROC D65

DTH surface drill rig for quarrying and mining

SmartROC D65 hole diameter: 110–229 mm (4.3–9")

Intelligent, automated and future-proof

The SmartROC D65 down-the-hole drill rig brings the future of mining within your reach today. Give your operation the chance to profit from the added intelligence of this market-leading drill rig.

The efficient SmartROC D65 consistently delivers high-quality blast holes with accuracy and precision. It is loaded with smart features such as automated drilling and rod handling. The extra long feed option with 8 meter pipes makes it possible to drill 16 m production holes with just one rod-adding. It's also possible to drill 229 mm holes (9 inches) thanks to the power of the COP M7 hammer. All these features and flexibility are packed in a rig which is economical to run due to the intelligent control of the compressor and engine rpm.

The SmartROC D65 also uses 300 liters less hydraulic oil than previous versions and features fewer hoses and pumps. This helps to further reduce costs and makes servicing easier, whilst increasing sustainability and reducing the environmental impact of the rig. The SmartROC D65 is controlled via an advanced rig control system displayed on a touch screen inside the comfortable, air-conditioned FOPS and ROPS-certified cabin. It presents everything from drilling parameters to real-time Measure While Drilling data (MWD). A SmartROC rig from Epiroc can significantly raise quality across the whole operation.

⊕ Main benefits

Intelligent, automated and future-proof as a result of Epiroc's unique Smart technology

Improved fuel consumption due to the automatic control of compressor-load and engine rpm

Efficient, productive and consistent thanks to automated drilling and rod handling

Revolutionize your mining operation

The SmartROC D65 is built to face the toughest of conditions. It's loaded with intelligent features that will improve your operations, increase safety and boost productivity. This rig is constantly evolving since it's introduction in order to ensure that your investment delivers increased production and profitability shift-after-shift.

+ Increase drilling time with the extra long feed

The SmartROC D65 is available with an optional extra long feed (XLF). It carries 8 meter rods with a diameter of 89, 102, 114, 127 or 140 mm. The feed can also be easily adapted to take 6 meter rods if required. The XLF option means that the rig spends less time threading and unthreading rods. In addition, the drill string is extracted more rapidly. All this adds up to more holes drilled per shift which increases both production and profitability. In order to enhance stability, Rigs built with this option are also fitted with tracks placed further apart (wide kit).

+ Self-diagnostic capabilities

The SmartROC D65 is well-proven, tough and dependable. However, should a situation arise, the rig features an ingenious self-diagnostic system to help track down problems quickly and effectively to keep downtime to a minimum. SmartROC rigs are also designed to make life easier. The electrical system features a reduced number of cables for example – this reduces problems and makes troubleshooting much quicker.

+ Operate multiple rigs remotely

With the BenchREMOTE option, one person can safely control up to three rigs simultaneously from up to 100 meters away which dramatically increases operator productivity and takes safety to a whole new level. In combination with the Hole Navigation System (HNS), the BenchREMOTE removes the need for operators and surveyors to work in hazardous areas.

A comprehensive service offering

Even the best equipment needs to be serviced regularly to make sure it sustains peak performance. An Epiroc service solution offers peace of mind, maximizing availability and performance throughout the lifetime of your equipment. We focus on safety, productivity and reliability.

By combining genuine parts and an Epiroc service from our certified technicians, we safeguard your productivity – wherever you are.

Main components

- Full drill cycle automation
 - Documentation by IREDES
 - Epiroc Rig Control System (RCS)
 - Troubleshooting support via cabin display
 - Vaportec compressor control
 - ROPS and FOPS approved cabin
- Aluminium profile feed beam
 - Pressure regulated break-out table
 - Turbo-charged CAT C15 diesel engine
 - Atlas Copco high-pressure screw compressor
 - Built for use with 4", 5", 6" and 7" down-the-hole hammers
 - Electric pump for filling hydraulic oil

*As service intervals may vary, please contact Epiroc customer service when drilling holes larger than 8"

Technical specifications

A fully-automated drill cycle which drills to desired hole length whilst adding and extracting drill rods automatically.

Semi automatic feed alignment system ensures that the hole is aligned exactly as desired.

Reduction in waste thanks to angle drilling and pre-split.

CAT C15 diesel engine in both Tier 4 Final/Stage V and Tier 3 variants.

Cabin

- ROPS and FOPS approved with rubber vibration dampers
 - 2 x wipers with washer
 - Clear laminated glass (front and roof windows)
 - Clear toughened glass (side and rear windows)
- Fully adjustable, electrically heated operator seat
 - Foot rest
 - Cabin light
 - Air conditioning/heating
 - Rig inclination indicator
- Rear view mirror
 - 24 V outlet socket
 - Prepared for audio system
 - Electric combined engine/inclination hole depth instrument

Optional equipment

- Carrier**

 - Wide body kit
 - Hydraulic support leg
 - Protection hand rails on top of canopy
 - Extra LED worklight package
 - Heavy duty air intake filters for engine and compressor
 - Combined warning sound and beacon
 - Manual or automatic Ansul Checkfire 210 fire extinguisher system
 - Electric fuel filling pump
 - Fast fuel-filling system
 - Diesel-driven engine pre-heater
 - Insulated and heated compressor regulation system
 - Arctic Fox -40°C cold start
 - Battery sliding tray

Water mist system

 - Water mist system, pump, one or two 400 l water tanks
 - Arctic-ready water mist system, pump, one or two 400 l water tanks
- Cabin**

 - 6 kg dry chemical fire extinguisher, type ABE class III
 - Clear laminated glass (front and roof windows)
 - Tinted toughened glass (side and rear windows)
 - Sunshade kit
 - Bluetooth radio
 - Reverse camera with display integrated into main display

Feed

 - Service winch with jib boom mounted on the feed
 - Wide feed foot
 - Protective guard, according to EN16228
 - 35° pre-splitting boom system
 - Reverse Circulation (RC)
 - Screw sampler device
 - Pre-split suction hood
 - Smartfold
- Lubrication**

 - Central lubrication system, type Lincoln
 - Thread lubrication, spray system
 - Artic hydraulic oil, VG 32
 - Tropical hydraulic oil, VG 68
 - Biological hydraulic oil, VG 46

Hole and inclination systems

 - Hole Navigation System
 - GPS compass aiming unit
 - Laser receiver

Automation and software

 - BenchREMOTE remote operator station
 - Rig Remote Access
 - Surface Manager Reporting
 - Rig Access control
 - Configurable safety software

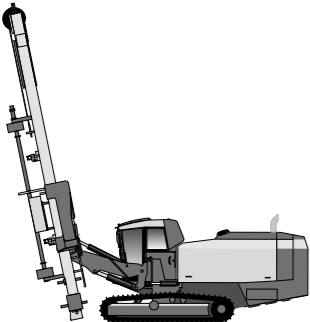

Parts and services products

 - ROC Care

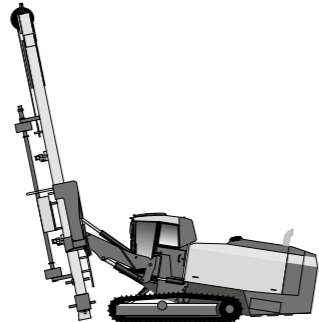

Optional accessories

 - Tool kit for rotary head with fixed spindle sub
 - Tool kit for rotary head with floating spindle sub
 - Lubrication kit
 - RCS tool box
