

High productivity in lower tunnels

The Boomer M1 L is a hydraulic face drilling rig for low-vein mining. The rig is ideally suited to drifts or tunnels 2.2–2.5 meters in height, with cross sections of up to 36 m². This sturdy rig features a burly BUT 29 boom and a COP rock drill for optimal productivity. The Boomer M1 L also comes equipped with a reliable direct control system and has been built to withstand plenty of wear and tear, day in and day out.

Main benefits

High performance in rough conditions thanks to excellent ground clearance and robust frame and axles to support wearing, oversized wheels

Outstanding drill steel economy with the COP 1638HD+, COP 1838HD+ and COP 2238HD+ rock drills that feature dual damping for efficient, high-speed drilling and greater drill steel longevity

Safety, comfort and surveillance thanks to the ergonomically designed FOPS/WUG certified cabin which ensures safety and comfort of the operator while providing excellent visibility

Strongest in its class

Specialized for work in low drifts and tunnels with cross sections up to 36 m², Boomer M1 L – only 1.8 meters tall – is the most durable rig in its class on the market. The sturdy carrier features an impressive tramming speed, and forges ahead even in the toughest conditions. The rig is equipped with a heavy-duty aluminium feed with high bending and torsional resistance for maximum durability.

+ Certified power and performance

The rig is powered by a 4-cylinder diesel engine that concurrently offers powerful performance and low emissions to reduce environmental impact. The rig engine is available with stage IIIA and IIIB compliance to conform to emission requirements in different jurisdictions.

+ Easy to operate and maintain

The Boomer M1 L operator enjoys an ergonomically designed cabin with a user-friendly interface to easily monitor and control all functions of the rig. The rig's design also provides straightforward access to all service points for easy maintenance.

+ The COP 1800HD+ series

Rock drills in the COP 1800HD+ series feature a sturdy four-head bolt design with separate lubrication of driver and gear. Pressurized side bolts and mating surfaces also contribute to reliable operation, low maintenance costs and long intervals between overhauls. The variable and reversible stepless rotation motor ensures high torque with exceptional speed control.

A comprehensive service offering

Even the best equipment needs to be serviced regularly to make sure it sustains peak performance. An Epiroc service solution offers peace of mind, maximizing availability and performance throughout the lifetime of your equipment. We focus on safety, productivity and reliability.

By combining genuine parts and an Epiroc service from our certified technicians, we safeguard your productivity – wherever you are.

Drilling system

COP 1638HD+	0
COP 1838HD+	•
Water mist flushing, internal water and air supply	0
Hole blowing kit	0
Rock drill lubrication warning kit	•
Big hole drilling system	•
Drill stop*	0
Air drier ECL oil rock drill	

*Mandatory for CE

Boom

BUT 29R	•
Automatic boom lubrication kit (rear part of the boom)	0
Boom suspension system	0
Boom parallell holding ovveride system	0

Feed
