

# Boomer S1

Single-boom face drilling rig for small drifts and tunnels with cross sections up to 33 m<sup>2</sup>

# Groundbreaking productive drilling

The Boomer S1 is a face drilling rig for mining and tunneling with a heavy-duty boom that copes well with high loads to help you achieve desired advance rates. The boom features a double tripod setup that enables fast, precise positioning and accurate hydraulic parallel holding in all directions.

## + Main benefits

**Safety and control** thanks to a FOPS certified telescopic protective roof or an ergonomically designed ROPS and FOPS certified cabin which ensures safety and excellent visibility and surveillance for the operator

**Outstanding drill steel economy** with rock drills that feature dual damping for productive, high-speed drilling and great drill steel longevity

**Large work radius** thanks to a reel with a total of 70 meters of water hose and a longer electrical cable for an extensive work radius

ROPS and FOPS certified cabin

Safe and comfortable operator environment.

Excellence in drill steel economy and productivity.

Boomer S1 can cover a large work area thanks to 70 meters of water hose and extended electrical cable.

COP 1800HD+ series rock drills with 600 hrs service interval gives low operating costs

Light weight heavy duty aluminum feed for fast and precise positioning between holes

Boom with a double tripod setup that enables fast and precise positioning

# A cutting-edge rig for drifting and tunneling

The robust Boomer S is ideal for tunnels with cross sections up to 33 m<sup>2</sup> and is equipped with a heavy duty feed for maximum durability. The drilling system incorporates rotation pressure controlled feed and an anti-jamming function for better drill steel economy and greater productivity.

## + Certified power and performance

The rig is powered by a 4-cylinder diesel engine that concurrently offers powerful performance and low emissions to reduce environmental impact. Engines are available with stage II, IIIA and IIIB certification to comply with emission standards in different markets. The diesel-driven hydraulic power source on the Boomer S1 D and S1 DH model provides outstanding flexibility; the diesel motor is used for both tramming and drilling.

## + Easy to operate and maintain

The operator enjoys an ergonomically designed cabin with a user-friendly interface to easily monitor and control all functions of the rig. With easy access to organized information, workflow is optimal. The rig is cleverly designed to provide straightforward access to all service points for easy maintenance.

## + The cop 1800HD+ series

Rock drills in the COP 1800HD+ series provide a sturdy four head bolt design, as well as a separate lubrication of driver and gear as well as pressurized side bolts and mating surfaces for reliable operation, low maintenance costs and long intervals between overhauls. The variable and reversible stepless rotation motor ensures high torque with exceptional speed control.

## A comprehensive service offering

Even the best equipment needs to be serviced regularly to make sure it sustains peak performance. An Epiroc service solution offers peace of mind, maximizing availability and performance throughout the lifetime of your equipment. We focus on safety, productivity and reliability.

By combining genuine parts and an Epiroc service from our certified technicians, we safeguard your productivity – wherever you are.

## Technical specifications

● - Standard ○ - Option  
A = Boomer S1 B = Boomer S1 DH

Drilling system	A	B	Electrical system	A	B
COP 1638HD+	○	○	Total installed power 59 kW* (main motors 1x55 kW)	●	
COP 1838HD+	○	○	Total installed power 79 kW* (main motors 1x75 kW)	○	
COP 2238HD+	○		Total installed power 99 kW (main motors 1x95 kW)	○	
Water mist flushing, external water and air supply (water or air oil cooler)	○		Voltage 380-1 000 V	●	
Water mist flushing, internal air and external water	○		Frequency 50 Hz or 60 Hz	○	
Internal water mist flushing system with 250 l water tank	○		Starting method star/delta 380-690 V, direct start 1000 V	●	
Internal water mist flushing system with 560 l water tank		●	Starting method – soft start (not for 1000 V)	○	
Hole blowing kit	●	●	Transformer 5 kVA (4 kVA North America)	●	
Rock drill lubrication warning kit	●	●	Electronic overload protection for electric motors	●	
Big hole drilling system	●	●	Percussion hour meter	●	
Dry drilling system with dust collector	○		Digital volt/ampere meter in electrical cabinet	●	
Drill stop*	○	○	Phase sequence and eart fault indicator	●	
*Mandatory for CE			Battery charger	●	
			Dual controls for reels	●
